

Concentrate for a brighter future

Our range of concentrates has been designed to give you the cleaning power you expect, with less packaging, less waste and, ultimately, less cost.

There are many benefits in switching to concentrates:

- helps the environment
- reduces storage
- reduces transport
- reduces packaging waste

More and more customers are switching to concentrates from the traditional, ready-to-use and standard concentrates products, which are bulky, heavy and frequently over-used. Diversey concentrate platforms ensure accurate dosing, giving you the right results in every area, every time.

Diversey concentrates: right for your business.

Diversey for a brighter future

Diversey has worked at the forefront of technical innovation in hygiene for more than 120 years. While product, fashions and science have changed, our customer focus remains as strong as ever.

We have the experience to provide the services you need, while maintaining the right balance on cost and sustainability.

Our cleaning products are widely used in healthcare, retail, food and building care environments, among many others. Diversey solutions include:

- **product systems**
- **floor care equipment**
- **cleaning tools**
- **employee training**
- **consultancy services**

Diversey will help to make your workspace cleaner and more sustainable.

Take advantage of our global supply network and class-leading solutions to improve your own environment.

The Diversey Commitment

We are proud of our century-long heritage of environmental stewardship, and our commitment to the highest standards of sustainable development in all of our operations. Our products, systems, and award-winning innovations are testament to our unwavering dedication to health and safety and environmental responsibility.

We work within strict policies and standards on the choice of raw materials and production processes, and continually look for ways to reduce our environmental footprint.

Diversey concentrate platforms explained

Diversey offers four complete concentrate platforms, which combine reliable technology with chemicals sure to deliver performance. We know that flexibility is important to you, so each of our systems can be used with a wide range of cleaning concentrates for:

- **hard surfaces, including worktops, desks and walls**
- **bathroom areas**
- **all floor types**

All of our concentrated products are suitable for use in spray bottles, buckets and scrubber driers.

Make your move – switch to Diversey concentrates

Our concentrated platforms have been created to provide the best outcome for everyone:

- **clean, hygienic results**
- **lower transport and storage costs**
- **safe and easy to use, so little staff training required**
- **low environmental impact**
- **better Cost in Use**

The QuattroSelect™, J-Flex®, AccuMix™ and SmartDose™ systems have all been designed to provide an efficient cleaning platform for all workplaces.

Choose the right system from our concentrate platforms:

- **QuattroSelect™** – a wall mounted dilution system for larger sites using three or four concentrates
- **J-Flex®** – a portable dilution system for smaller sites using one or two concentrates
- **AccuMix™** – a portable, convenient option with a built in measuring spout to make measuring the right amount for buckets or auto-scrubbers simple where no water connection is possible
- **SmartDose™** – a highly innovative, portable and convenient dosing system supporting all your daily cleaning needs with including GreenSeal certified concentrates

Concentrate
for the environment

Choose your system.
Choose your concentrate.
Create your platform.

QuattroSelect™

The wall mounted QuattroSelect™ system is designed for larger sites, where our lockable dispensing stations can be connected to a water supply.

A large range of Diversey TASKI products can be used with **QuattroSelect™**. The concentrate is automatically diluted, providing optimum cleaning capability and control.

Choosing **QuattroSelect™** will improve efficiency with high-speed accurate filling of bottles, buckets and scrubber driers with it's two flow rates. It provides excellent results in a simple and easy way with precise dilution.

Each **QuattroSelect™** can deliver up to 2500 litres of ready-to-use product with just two pouches – saving on transport, storage and packaging waste, making it the environmentally friendly product of choice, while improving your operational costs.

J-Flex®

The portable J-Flex® system provides a rapid dilution system for smaller sites, where one or two cleaning products are used on a wide basis. With connection to a water supply, the patented J-Flex® bottle and dilution system, provides an automatic dispensing service.

The **J-Flex®** system makes under-or over-dosing a problem of the past, ensuring that your cleaning solutions are perfect for the task in hand as well as cutting product wastage.

In line with Diversey's commitment to the environment, **J-Flex®** will drastically cut the transport and packaging waste associated with traditional products and is fully recyclable. In addition, the systems concentrate bottles are smaller and lighter than standard concentrates packaging, reducing health and safety issues and making life easier for your staff. **J-Flex®** is the excellent option to kick start your operation with minimum start up investment.

AccuMix™

AccuMix™ Portion Control System is the unique cleaning system with a built-in accurate measuring spout. Simply loosen the cap, squeeze and pour the concentrate into a bucket or scrubber tank. Get the right proportions every time. No measuring hassles means less product waste.

The **AccuMix™** range of super-concentrated products are seven to nine times more concentrated than standard concentrates giving you the benefit of reductions in transport, storage and packaging waste.

SmartDose™

SmartDose™ is an innovative dosing platform for super concentrate daily cleaners and disinfectants setting a new industry benchmark of accuracy, simplicity and safety for the users without the need for a connected water supply.

The Smart pump technology is very practical and uses icon based instructions. This makes it possible to vary shot sizes for any of the different cleaning methods including spray cleaning, bucket cleaning or scrubber driers, but requires minimal user training and no measuring. And being a closed system, it provides the maximum level of safety and cost control.

SmartDose™ also dramatically reduces the environmental footprint of all it's users and is fully recyclable. **SmartDose™** offers packaging, chemical, storage as well as transport benefits versus standard platforms.
